WHY PROGUARD?

We provide you with a comprehensive program to not only improve your service, response time and overall communications but also improve your overall bottom line both in terms of program savings and new customer/revenue generation! We look forward to the privilege of improving your service, giving you outstanding pricing and being a great partner to you.

A few of our differentiators are:

- Personal, Local & Clear Communication & Support
- We grow with you! We are able to take care of our clients as they grow throughout the U.S., Canada and Puerto Rico.
- Our program includes 3rd party auditing support, both prior to and during audits.
- Our unique approach provides customized solutions for your business which include reoccurring educational sessions with your staff that focus on prevention and early detection.
- Dedicated & Responsive - We are here whenever you need us.
- As an extension of the relationship we have with you, we become an employee benefit. Your employees and their families will have preferred pricing for any service they may want or need (including Bed Bug Services - both Proactive and Curative).
- We are a resource for you and always here to serve you as needed. Some as-needed services include Wildlife Trapping and Exclusion, Bed Bug, Bird and Geese Management and Termite Pre-treatments for any new construction.
- We have an on-staff entomologist that is dedicated to exploring and testing new and improved ways to take care of our clients. We pride ourselves on being on the leading edge of pest management practices and wildlife conservation.
- We make it easy with a Professional & Personal Approach. Our staff is trained and licensed for pest and wildlife management, and also go through Emotional Intelligence training to enhance the customer interaction and improve client and customer communication.

Our Strategic Partners

Some of Our Valued Clients

The Columbus Zoo, Zoombezi Bay, The Wilds, Nationwide Arena, Columbus Clippers/Huntington Park, Dayton Dragons, Columbus Crew, National Grocery Stores and Fast Food Restaurants

What is Integrated Pest Management?

ProGuard practices Integrated Pest Management (IPM). Government regulatory agencies and consumers alike favor IPM because of its reduced risk to non-target organisms and improved long-term results. IPM combines intelligent decision-making with all applicable preventive and corrective measures to reduce pests, and does not rely exclusively on the use of conventional insecticide treatments.

Our Programs

Premium Advantage (Third Party Audits)

This program is designed to meet stringent food processing, audit and inspection requirements. Our sales team and service technicians are certified and skilled in food plant pest management. This program targets ants, flies, stored product pests, mice, rats and cockroaches. Our premium program specializes in IPM for food and beverage processing facilities, pharmaceutical and food-grade packaging, warehousing and distribution facilities.

Lodging Advantage

We help hoteliers manage their various brands and properties with a consistent program. This program targets ants, mice, rats and cockroaches. Additional pests can be added, such as our fly management program. Bed bug monitoring, treatment and training programs are also available. We treat resorts, conference centers, suite hotels, full service, extended stay and limited service hotels and motels.

Healthcare Advantage

We offer a comprehensive program implementation in which we meet with key staff and service personnel to kick off the program. This program targets ants, mice, rats, cockroaches, stinging insects and spiders in healthcare facilities such as nursing homes, hospitals, clinics and assisted living facilities. Additional pests can be added.

Culinary Advantage

Our service technicians specialize in servicing quick serve, fine dining and casual dining restaurants in addition to educational institutions and outside vendors. Our program targets ants, mice, rats, cockroaches and flies. Additional pests can be added. We understand the extreme importance of maintaining a clean and pest-free dining facility.

Total Advantage

Our general IPM program is designed for facilities that need programs customized to their specific requirements. This program is able to target ants, rodents, cockroaches, stinging insects and other perimeter invaders. Additional pests can be added.

"I depend on ProGuard's commitment to us. They are extremely knowledgeable, helpful and responsive and go above and beyond to ensure our satisfaction."

Ann, Commercial Property Manager

Our Bed Bug Services

Bed bugs can hitchhike on luggage of travelers who stay in motels, hotels or homes that are infested with bed bugs. Bed bugs also make their way into dwellings when people acquire used furniture. In multiple-dwelling buildings (apartments, hotels and motels, dormitories), bed bugs travel from active units into inactive ones. There are many tools for ridding buildings of bed bugs.

ProGuard offers the following treatments:

- **Proactive Treatment**
 - Less invasive treatment with less preparation required
 - Reduced risk treatment
 - Peace of mind, keep infestations from occurring
- **Curative Treatment**
 - Heat Treatment
 - Liquid Treatment
 - Dusting Treatment

Our Termite Program

The Sentricon® System is designed to eliminate the entire termite colony, not just individual termites, making it the most effective termite control product available. And, it is only available through Certified Sentricon Specialists, like us, who are among the industry's best pest management companies. Sentricon begins the termite colony elimination process on Day One, and provides continuous property protection 24/7/365.

Our Wildlife Programs

- Live-Trapping and Removal
 - Exclusion
 - Bird in Vent
 - Structural Damage Repair
 - Bat Removal
 - Insulation
